Professional Summary

Growth-driven Computer Science Engineering student and Math Club Coordinator with a strong technical focus on Core Java, Object-Oriented Programming (OOPs), Data Structures, and Data Science. Hands-on developer experienced in full-stack engineering, desktop applications, and AI/ML implementations across 5 technical internships and multiple competitive hackathons. Adept at translating complex data parameters into functional, real-world solutions and clean, well-documented code.

Education

Bachelor of Engineering (B.E.) — Computer Science and Engineering *Panimalar Engineering College, Chennai, Tamil Nadu*

- **Timeline:** 2024 – 2028 (Expected Graduation: May 2028)
- **Academic Standing:** CGPA: 8.55 / 10
- **Leadership Role:** Math Club Coordinator

Higher Secondary Certificate (HSC) *M.S.P. Solai Nadar Memorial Hr. Sec. School*

- **Year of Completion:** 2024 | **Score:** 80.33%

Secondary School Leaving Certificate (SSLC) *M.S.P. Solai Nadar Memorial Hr. Sec. School*

- **Year of Completion:** 2022 | **Score:** 55.6%

Technical Skills

- **Programming Languages:** Java (Advanced Core & OOPs), Python, C, C++ (Intermediate), JavaScript
- **Frameworks & Libraries:** React.js, Node.js, Spring Boot, Java Swing
- **Data Science, AI & Web:** Data Structures, Algorithm Design, Machine Learning, Generative AI & Chatbots, Power BI, HTML, CSS
- **Databases & Cloud:** MongoDB, Firebase, AWS Services, Google Cloud Platform
- **Developer Tools:** Git, Postman API testing, File I/O

Work Experience & Internships

AI & Machine Learning Intern | *Edunet Foundation (AICTE) Jan 2026 – Feb 2026 (Remote)*

- Successfully executed practical implementations of AI/ML concepts within a 6-week technical training matrix.

- Acquired industry-aligned exposure to emerging technology deployment models and predictive analysis architectures.

Software Developer Intern | *Stackmod Innovations Pvt. Ltd. Dec 2025 – Jan 2026 (Technopark, Trivandrum)*

- Architected a desktop-based Student Management System utilizing clean Java (OOP) patterns.
- Designed a Swing-based GUI incorporating custom CRUD (Add, View, Update, Delete) sub-modules.
- Engineered unique Student ID verification routines and local file-handling pathways for offline data persistence.

Java Programming Intern (Star Performer) | *InternPe Dec 2025 (Remote)*

- Honored with the **"Star Performer"** award for outstanding dedication and creative execution across the batch.
- Engineered a suite of classic graphical interactive games (Connect Four, Tic-Tac-Toe, Rock-Paper-Scissors) using Java Swing.
- Developed programmatic state logic handling win, draw, and automated board reset metrics.

Python Programming Intern | *CodeAlpha July 2025 (Remote)*

- Received an official **Letter of Recommendation** for showcasing high analytical capability and code dedication.
- Built 4 real-world programs including an Advanced Rule-Based Intent-Mapping Chatbot and a Stock Portfolio Tracker.
- Successfully handled complex file character mapping bugs like UnicodeEncodeError through UTF-8 configuration.

Python Intern | *Codec Technologies India May 2025 – June 2025 (Remote)*

- Engaged in logic-building exercises, algorithmic structured problem-solving, and basic workflow automation scripts.

Course Instructor (Web Design & Office Tools) | *NKI Computers May 2024 – July 2024 (Tamil Nadu, India)*

- Led technical instructional lectures guiding students through foundational web elements using HTML and CSS.
- Instructed classroom cohorts on optimizing day-to-day productivity using Microsoft Office suites.

Hackathons & Featured Projects

Neuro Compiler | *SATHAK-A-THON 2.0 (Mohamed Sathak A.J. College of Engineering) Backend & Database Developer (React, Node.js, MongoDB, Python)*

- Co-developed a high-concurrency GUI multi-language compiler platform designed for classroom laboratory examination sessions.
- Configured the underlying MongoDB infrastructure to handle user profile creation and real-time execution histories.
- Integrated underlying isolated compiler instances with an AI-driven script module to provide automated debugging and runtime feedback loops.

HealthAssist AI | *Google Cloud Run Hackathon (Organized by Google Cloud & DevPost) Cloud Integration & AI Engineer (GCP, Gemini AI, Chatbot)*

- Collaborated on a rapid-delivery team to develop an empathetic healthcare conversational assistant aimed at driving equitable access.
- Deployed the system on Google Cloud container instances using Gemini AI API models to generate reliable responses.

Certifications & Core Coursework

- **Key Academic Coursework:** Data Structures & OOPs | Analysis and Design of Algorithms | DBMS | AI & Cloud Computing
- **Cloud & Architecture:** AWS APAC Solutions Architecture Virtual Experience (Forage) | AWS Educate (Cloud 101, Gen AI, ML Foundations)
- **Data & Business Intelligence:** Exploratory Data Analysis Level 2 (Accenture/FutureSkills PRIME) | Power BI for Beginners (Simplilearn)
- **AI Foundations:** AI Ascend 2026 Program (Kyndryl & AWS) | AI Fundamentals (IBM SkillsBuild) | Generative AI Studio (Simplilearn)
- **Certifications & Tooling:** Postman API Fundamentals Student Expert | Basics of Python (Infosys Springboard) | C Programming (GUVI & HCL)
- **Professional Skills:** Employability Skills - JobReady (SWAYAM - 105 Hours) | Obtain an Appropriate Job Course (Wadhvani Foundation)
